#### Instructor Guide

## **<u>Drill</u>**: Hazardous Materials Operations - Local Option

Session Reference: 1

Topic: Hazardous Materials Local Operations

Level Of Instruction:

Time Required: Three Hours

Materials: \*Hazardous Materials Response Unit

\*Various Level A and Level B Suits

\*Decontamination Equipment

\*Chalkboard

References: \*Frederick County Hazardous Incident Response

Team Standard Operating Procedures

\*Frederick County Incident Command System

# Preparation:

Motivation:

Objective (SPO): 1-1

The student will demonstrate a basic understanding of assistance activities and support to the hazardous materials team by applying the information covered in practical activities.

Overview:

# **Hazardous Materials Local Operations**

- \* Describe responsibilities prior to arrival of team
- \* Describe responsibilities upon arrival of team
- \* Demonstrate setting and operating decontamination station
- \* Demonstrate assisting donning chemical protective clothing

Page 1 www.mfri.org

### Session 1 Hazardous Materials Local Operations

- SPO 1-1 The student will demonstrate a basic understanding of assistance activities and support to the hazardous materials team by applying the information covered in practical activities.
- 1-1 Describe the responsibilities of on scene personnel at a hazardous materials incident prior to the arrival of the hazardous materials team.
- 1-2 Describe the responsibilities of on scene personnel at a hazardous materials incident upon the arrival of the hazardous materials team.
- 1-3 Demonstrate setting and operating a decontamination station in support of a hazardous materials team.
- 1-4 Demonstrate assisting a member of a hazardous materials team to don chemical protective clothing.

Page 2 www.mfri.org

NOTE:

This material is intended to be taught following the Hazardous Materials
Operations Course offered by the Maryland Fire and Rescue Institute. It can, however, also be used as a local Hazardous Materials Operations Refresher Drill.

- I. Responsibilities Prior to Team Arrival (1-1)
  - A. Keep all personnel a safe distance from the hazard and do not permit any operations to take place which are beyond their capabilities (training and equipment)
  - B. Initiate incident command system and appoint scene safety officer
  - C. Maintain control over all emergency responders and civilians
  - D. Attempt to identify the problem
    - 1. Product leaking or spilled
    - 2. Form of product solid, liquid, or vapor
    - 3. Hazard of product flammable, corrosive, or reactivity
    - 4. Identification of product(s) identification numbers, shipping
      papers, placards or labels,
      container types or shape, type of
      occupancy, knowledgeable
      individual(s), pre-incident
      information

Page 3 www.mfri.org

- 5. Type of container transportation (non-pressurized
  or pressurized), fixed or
  stationery (non-pressurized or
  pressurized) bag, box, drum,
  glass container, pail
- 6. Metering for combustibility LEL
- 7. Other product information
- E. Attempt to assess the risk
  - Reference materials DOT Emergency Response Guide
  - 2. Exposures human, animal, structural, environmental
  - 3. Resource available staffing, apparatus, equipment, technical specialists
  - 4. What already happened
  - 5. What is likely to happen
- F. Defensive measures
  - 1. Establish the hot, warm, and cold zones
  - 2. Control access to scene
  - 3. Control and containment diking, vapor suppression, container cooling, pooling

Page 4 www.mfri.org

- 4. Evacuate people in immediate danger
- 5. Protect exposures
- II. Responsibilities Upon Team Arrival (1-2)
  - A. Share problem and risk information
  - B. Explain actions taken
  - C. Determine appropriate course of action
    - 1. No further fire department action required
    - 2. Maintain current defensive action
    - 3. Evacuate to safe distance
    - 4. Initiate offensive action
      - a. Provide fire suppression support to team
      - b. Provide medical support to team
      - c. Provide personnel support for decontamination and donning chemical protective clothing
      - d. Provide personnel to assist with metering

Page 5 www.mfri.org

- e. Maintain liaison with incident commander
- III. Setting Up and Operating Decontamination (1-3)
  - A. Identify the level of protective clothing required for decontamination
  - B. Identify the type of decontamination wet or dry
  - C. Identify the number of stages in the decontamination station
  - D. Identify the decontamination solution
  - E. Identify the location of the decontamination station
  - F. Setting up decontamination station
    - 1. Set up large containment area using plastic and 150 feet of 2-1/2-inch or 3-inch hose which has been inflated with air
    - 2. Mark off area with barrier tape and traffic cones (lighting for night operations)
    - 3. Identify clean side and dirty side of containment area
    - 4. Set up containment areas within large containment area wading pools with absorbent pads and standing platforms

Page 6 www.mfri.org

- 5. Set up tool drop, glove drop, and boot wash stations
- 6. Set up decontamination equipment brushes, sprayers and hoses or vacuums, shower
- 7. Set up doffing area for removal of chemical protective clothing
- 8. Set up disposal area for contaminated materials and clothing
- 9. Set up inflatable shelter for disrobing of contaminated people
- G. Operation of decontamination station
  - 1. Identify personnel to staff station one or two at each stage
  - 2. Process personnel through medical evaluation required for anyone donning chemical protective clothing
  - 3. Have personnel don appropriate protective clothing and SCBA
  - 4. Assign personnel to stages
  - 5. Review decontamination operations with personnel must be done prior to entry

Page 7 www.mfri.org

- Personnel assume assigned 6. positions
- Once all entry personnel have 7. been decontaminated, decontamination personnel must be decontaminated
- Process personnel through 8. medical evaluation upon completion of assigned decontamination duties
- Properly contain any 9. contaminated runoff
- 10. Dismantle decontamination station
- IV. Donning Chemical Protective Clothing (1-4)
  - A. Dressing Out in Chemical Protective Clothing
    - Assemble area with seating for 1. donning clothing
    - Collect proper chemical 2. protective suit, gloves, boots, SCBA, and radio for respective team member
    - 3. Assist with putting on surgical gloves
    - Assist with getting into legs of 4. suit

Page 8 www.mfri.org

- 5. Assist with putting on boots
- Assist with putting on SCBA backpack and facepiece when Level A suits are used - leave low pressure hose disconnected
- 7. Assist with putting on radio when Level A suits are used
- 8. Turn on air cylinder
- 9. Assist with getting in arms of suit
- 10. Assist with putting on any additional gloves required
- 11. Assist with putting on hood of suit
- 12 Zip up flap and pull draw strings in Level B suit is used
- 13. Assist with putting on SCBA backpack and facepiece when Level B suits are used leave low pressure hose disconnected
- 14. Assist with putting on radio when Level B suits are used
- 15. Tape around facepiece, glove wristlets, boot tops, and flaps if Level B suits are used
- 16. Put on air and note time report time to team safety officer

Page 9 www.mfri.org

- 17. Zip up suit if Level A is used
- B. Reverse process for removal of suit, taking care not to touch the inside of the suit (the last item removed is the SCBA)

### V. Practical Activities

- A. Have the students demonstrate setting and operating a decontamination station.
- B. Have the students demonstrate assisting a member of a hazardous materials team to don chemical protective clothing.
- C. Student Evaluation All students will be evaluated by the following means:
  - Oral questioning/class participation
  - 2. Observed performance in classroom exercises.

Page 10 www.mfri.org

## Review:

# Hazardous Materials Local Operations

- \* Describe responsibilities prior to arrival of team
- \* Describe responsibilities upon arrival of team
- \* Demonstrate setting and operating decontamination station
- \* Demonstrate assisting donning chemical protective clothing
