

## FIRE DEPARTMENT STATISTICS

# Combination Fire Department 2020 Run Survey

*Firehouse Magazine*, the Volunteer & Combination Section (VCOS) of the IAFC, and the National Volunteer Fire Council (NVFC) have compiled the 11<sup>th</sup> annual Combination Fire Department Run Survey, featuring statistics on apparatus, budgets, membership, and fire and EMS calls.

In addition, we received answers to several questions that provided some eye-opening results. Almost 70 percent of the firefighters at these departments are using PPE that is 5 years old or older, with one department using PPE more than 11 years old and only two departments with PPE less than a year old. Approximately 43 percent of the firefighters at these departments do not have a second set of gear.

In regards to apparatus, 62 percent are using rigs that are at least 11 years old, with four departments using apparatus more than 21 years old. None of the departments reported having a new piece of apparatus, while just four have a rig less than five years old.

COVID-19 took its toll in 2020 as 85 percent reported at least one case, with the average being five members contracting the disease. While this left these departments short-handed at times, 47 percent reported no change in call volume during the pandemic.

### COMMUNITY CHARACTER LEGEND

I = Industrial      U = Urban  
S = Suburban/bedroom      R = Rural
